- In the process of mastering...

SOFT SKILLS

- Communication
- Public Speaking
- Team Collaboration (enhanced through academic and real-world projects)

WORK EXPERIENCE

Techfusion Technologies - Web Development Intern

July 2023–August 2023

Here I have created a blogging platform in which a user can register, login and add blogs and also can see other users uploaded blogs with a proper session management and many other features.

- Gained hands-on experiences with the Flask web framework in Python.
- Developed a dynamic Blog website with features such as user authentication, blog creation, editing, and deletion.
- Applied CRUD operations and used MySQL for data storage.
- Strengthened skills in Python, HTML, CSS, and Flask.

Ek Pehel Foundation (Affiliated to Goldenmace IT Solutions)

January 2024–April 2024

Here, I have learnt many technologies like HTML, CSS, Bootstrap and Wordpress(Elementor), and took hands on experiences by the employees of Goldenmace IT Solutions.

- Built responsive websites using HTML, CSS, Bootstrap, and WordPress (Elementor).
- Gained hands-on experience with CMS tools and layout structuring.
- Improved teamwork, communication, and problem-solving skills through real-world project exposure.

PROJECTS

CureCart

April 2025

It was a group project and we built a fully functional online pharmacy platform using Laravel, enabling users to browse medicines, manage their cart, and place orders securely.

- Implemented features like user authentication, product CRUD operations, and order tracking using Laravel's MVC architecture.
- Applied CRUD operations and used MySQL for data storage.
- Integrated Razorpay for secure and seamless payments.

Employee Management System (EMS)

August 2024

Developed a GUI-based desktop application using Python's Tkinter framework to manage employee records efficiently. Enabled functionality for adding, updating, viewing, and deleting both new and existing employee details.

- Applied CRUD operations and created a database file to store data.
- Mail features for new employees on successful registration.

WonderWings

April 2025

Built a website that can book flight tickets with Razorpay integration using PHP, Bootstrap, MySQL and Razorpay.

- User can register, login and book the flight and can choose the destination and date as well.
- User can select seat by his/her choice from the seat matrix.
- Razorpay Integration for seamless payments.

VisaEase

July 2025

Built a website to book foreign trips and visa service of various types like Work visa, business visa, student visa. This website is developed using ReactJs for frontend, NodeJs for backend (API) and MySQL for database.

- Built a full-stack travel booking platform where users can register, log in, also send an inquiry form and select services based on available destinations.
- Integrated an admin panel to manage country listings, enabling users to book tickets and make payments accordingly.
- Implemented a secure "Forgot Password" feature that sends the user's credentials via email.
- On successful payment, users receive an automated booking confirmation email for enhanced user experience.

AI-Enabled Rapid Detection System for Adulteration in Turmeric Powder - SSIP

The project develops an AI-powered portable device to quickly detect harmful adulterants in turmeric powder using image analysis and spectroscopy. It provides real-time purity results through a mobile application, helping improve food safety and consumer trust.

- AI-based portable device for instant detection of adulteration in turmeric powder.
- Uses image analysis and spectroscopy with machine learning for accurate purity testing.
- Provides real-time results through a mobile app with purity status and recommendations.
- Enhances food safety and supports farmers, traders, and consumers with low-cost testing.

CERTIFICATIONS

- [Google Generative AI Certification - Gen AI Study Jam](#)
- The Basics of Google Cloud Compute - Google Cloud

EXTRA-CURRICULAR HOBBIES

- Managed event logistics and coordination during the College Technical Fest, ensuring smooth execution of technical sessions and workshops.
- Core Team Member at Techno Labs Club, actively contributing to technical discussions, workshops, and mentoring junior members.
- Active Member of Google Developer Group (GDG) On Campus and Raccoon AI at ITMBU participating in developer meetups, sessions.
